

Celadrin<sup>®</sup> is a medically and clinically proven Joint Health compound developed through a proprietary process of esterifying oils. Celadrin is an innovative, all natural ingredient which has been medically shown to reduce inflammation and pain with no side effects. Along with its many studies and scientific presentations, Celadrin has been published on two occasions in the internationally acclaimed Journal of Rheumatology.

In a double blind, matched pair topical cream study, conducted at the University of Connecticut, 100% of the osteoarthritic subjects on Celadrin showed significant improvement in just 30 minutes and cumulative benefits throughout the remaining 30 days of the study. Patients were assessed for range of motion, pain levels, timed up and go, timed stair climbing and muscular endurance tests. Significance was demonstrated in every test. The Celadrin compound represents a matrix of fatty acid carbons which have been scientifically arranged to achieve maximum efficacy for joint mobility and health.

Celadrin is a revolutionary complex which has been scientifically designed to restore mobility and relieve pain quickly.

- Celadrin is comprised of innovative, targeted & proprietary cetylated fatty acid esters & other active synergists.
- Celadrin proprietary compound is scientifically designed to be absorbed rapidly and provide immediate and continuous/cumulative pain relief.
- Celadrin, available for either oral or topical applications, enhances cell membranes throughout the body and restores fluids that cushion bones and joints to promote flexibility and mobility.
- Celadrin has been shown to be very safe & efficacious as evidenced by gold standard, double-blind, placebo-controlled clinical & scientific studies.
- Celadrin is FDA compliant and non-prescriptive.

### Benefits

- Clinically shown for being fast acting (within 30 minutes) with rapid and deep absorption/penetration to the affected area.
- Clinically proven to be effective in both oral and topical applications.
- 100% of the patients in the study on the proprietary cream showed significant benefit compared to the patients on the placebo.
- Celadrin will provide speedy relief to aching, painful joints, muscles and tissues.

### The American Foot Pain Experience

- 47% of Americans will experience foot pain
- 200,000 to 300,000 lbs. of stress on our feet with every mile we walk
- Most people have walked 75,000 miles by the time they're 50
- 19% of Americans report foot pain has inhibited them from performing daily activities (29% for men/women between 51 and 60)
- Osteoarthritis – inflammation of the joints
  - Half of people in 60s and 70s have arthritis affecting the foot or ankle
  - Glucosamine does not reduce inflammation
  - Glucosamine does not absorb topically
- Over 20 million diabetics in the US
  - 60-70% have nervous system damage (up to 50% specifically affect the feet)
  - 25% will suffer from foot ulcers in their lifetime
