## Features

## Benefits

- Alcohol-Free, Non-drying to skin
- Non-flammable
- Published in respected peer-reviewed medical journals: *AORN, JAPMA, Family Medicine, and Journal of School Nursing*
- Rinse-free – No water necessary

- Maintains skin integrity and cleanses more effectively
- Will not sting or dry delicate skin, and safe to ship
- Safe to use in any environment
- Scientifically proven claims
- Convenient when soap and water are not available or easily accessible – no need to use water or wash off

- Kills 99.99% of disease-causing germs in 15 seconds including antibiotic resistant VRE & MRSA
- Kills 99.99% of disease-causing fungi (molds and yeasts) and viruses, including HIV, human coronavirus related to SARS virus, and Hepatitis A and B

- Rapidly sanitizes skin, with a broad-spectrum kill that prevents the development of resistant germs
- Provides real peace of mind that hands are clean

- Lethal to germs, gentle to skin
- Non-irritating, non-toxic

- Powerful germ-killing effectiveness in a patented SAB formula that promotes new healthy skin formation
- Softens like a lotion so repeated use won't cause redness or chapping

- **Only** instant hand sanitizer available that meets and exceeds FDA CFR 333.470\* performance standards
- Meets and **exceeds FDA requirements** for persistence of activity for healthcare personnel and food handlers

- **More effective than alcohol-based products**
- Germ-killing activity actually increases the more the product is used throughout the day

\* Federal protocol for "Effectiveness testing of an antiseptic handwash or healthcare personnel antiseptic handwash."
