

For Immediate Release

WOODWARD LABS ANNOUNCES AN EXTENSION TO ITS NUMBER ONE MYCOCIDE LINE

21-June-04

Aliso Viejo, CA – Woodward Laboratories Inc., a leading provider of quality, antimicrobial products for the skin and nails, announces a new product under its national Mycocide brand with the introduction of Woodward's MYCOCIDE® CX Antimicrobial Callus Exfoliator. Mycocide CX exfoliates and restores natural moisture to dry, callused skin while helping prevent fungi, bacteria, and viruses from infecting the cracked areas.

Mycocide CX contains both Woodward's patented delivery system and antimicrobial killing power that helps prevent infection. The main problem with heel calluses is the tendency of the skin to compress and split. The patented SAB formulation in Mycocide CX provides three advantages not available from any other product in this category. First, the antimicrobial active ingredient kills 99.99% of the germs that cause infections. Second, Mycocide CX contains allantoin, a natural ingredient that promotes the healing of damaged skin and the healthy growth of new skin. Third, the natural softening and exfoliating system allows the callus to be gently removed with a pumice stone or even a finger nail scraping after a few days of normal use as directed.

Foot care is especially vital for people with diabetes and Mycocide CX is safe for delicate and sensitive skin. By using natural skin softening agents and emollients, skin becomes healthier, smoother and softer in just seven to fourteen days.

About Woodward Laboratories, Inc.

Founded in 1992 and recognized as the world's foremost manipulator of quaternary amines, Woodward Laboratories is the first company to research, develop, manufacture, and market over-the-counter (OTC), topically applied antimicrobial products which kill fungi, bacteria, and viruses; and are non-damaging to the skin and nails. The company's many products are available at retail outlets nationwide and serve the consumer, beauty, medical, veterinary, and institutional market places with antimicrobial products designed to provide a healthier way of living.
